

Proposed Budget

14496 SE River Road, Oak Grove, Oregon 97267 (503) 654-7765 @OakLodgeWater oaklodgewaterservices.org

About the District

The Oak Lodge Water Services District (District) is committed to creating a clean water environment and a healthy community. The District provides reliable drinking water, sanitary sewer, and watershed protection services to nearly 29,000 people in Oak Grove, Jennings Lodge, and portions of Milwaukie and Gladstone.

Drinking Water Services

The District provides customers safe, reliable drinking water from the Clackamas River. Customer rates fund essential services, including purchasing clean water and maintaining daily operations, and investments in infrastructure.

Sanitary Sewer Services

The District collects wastewater from homes and businesses so the water can be cleaned and safely returned to the Willamette River. Customer rates fund essential services, including wastewater treatment, maintaining daily operation, and investments in treatment plant and infrastructure.

Watershed Protection Services

The District helps protect the environment by monitoring water quality in local waterways and helping to keep the Clackamas County-owned stormwater system clean. Customer rates fund watershed protection activities necessary to comply with state and federal water quality permit requirements.

Boardman Wetlands

The new park and trail in Jennings Lodge was completed in 2020 and is featured on the cover page of the Budget. This 5.8-acre nature park and restored wetlands features a play area, a scenic boardwalk trail loop, and outdoor educational areas. This was a result of a partnership between the District and the North Clackamas Parks & Recreation District. The park provides recreational activities for all ages, opportunities to connect with nature, and access to observe the diverse ecology of wetland habitats.

BUDGET MESSAGE

Members of the Oak Lodge Water Services District Board, Citizen Members of the Budget Committee, and Residents of our District---submitted for your information is the 2021-2022 Budget. The following pages highlight aspects of the District's Budget based on the current status and as influenced by prior periods as well as our vision of the coming year and beyond.

STATE OF THE STATE

Four times a year (in March, June, September, and December) the Oregon Economic and Revenue Forecast is released. The Oregon economic forecast is published by the Department of Administrative Services to provide information to planners and policy makers in state agencies and private organizations for use in their decision-making processes. It is the basis for much of the budgeting in Oregon state government. In the March 2021 Oregon Economic and Revenue Forecast Report, it states on page one:

"The economy is emerging from a dark winter. The resurgent virus of a few months ago is in full retreat. The outlook brightens with every inoculation. The stage is set for stronger economic growth this year and next than the U.S. has experienced in decades, possibly generations. The combination of increased vaccinations, large and swift federal policy responses, and a more resilient underlying economy, results in a cycle unlike anything experienced before.

Most encouraging is that the amount of economic scarring to date in terms of business closures and permanent layoffs is much better than first feared. Total personal income is higher today than it was prior to the pandemic, despite Oregon having 160,000 fewer jobs. Households, particularly those in the middle and upper parts of the income distribution have built up considerable amounts of savings. As the pandemic continues to wane, pent-up demand will be unleashed, fueling growth in the months ahead. The shift in spending out of physical goods and back into labor-intensive, in-person consumer services will raise employment significantly. While the labor market remains in a deep hole today, a bit more than half of those lost jobs will be regained this year. The rest will be regained next year. Oregon's economy will return to full employment by early 2023, or 6-9 months sooner than expected in previous forecasts.

Although many are suffering, aggregate income has risen sharply during the recession. As an income tax state, Oregon's primary revenue instruments have followed suit. The General Fund revenue outlooked has brightened accordingly. Immediately following the start of the pandemic, the revenue outlook was revised down by around \$2 billion. As of the current forecast, this hole has completely been filled. The new outlook calls for a bit more revenue than was expected before the recession began.

Many factors are playing into the unexpectedly strong revenue collections, but two reasons stand out. First, the unprecedented amount of federal aid has translated into around \$1.5 billion in additional tax liability. Second, unlike previous recessions, asset markets have continued to gain value and corporate income has held steady."

STATE OF THE DISTRICT

The past year has been unique in terms of the sheer number of different natural disasters experienced by the District and the District's customers. There has been plague, fire, high winds, storms, and ice leading to more people working from home, unhealthy levels of smoke, downed trees, electrical outages, and high-water issues. Throughout them all Oak Lodge Water Services District (OLWSD) continued to deliver services day in, day out meeting the District Commitments:

Our Commitments

Protect public health

Provide excellent customer service

Make smart investments and keep rates affordable

Keep our streams and rivers clean

The District is positioned to address any further challenges head on in the coming year and take full advantage of opportunities for customers, team members, and the community. The proposed budget for fiscal year 2021-22 is an illustration of that position and the District's commitment to success.

Since the beginning, the District has implemented the Board of Director's goals and adjusted to priorities dictated by changes in the business environment and the local and national economies. The District provides a high level of service to customers in the form of water quality, reliable wastewater collection and treatment, watershed protection, and exceptional customer service. While faced with the recent and unprecedented reality of COVID-19, the District has continued to meet the needs and wants of customers and protect District team members. The District would not have been able to continue to deliver services in the midst of the variety of natural disasters without the flexibility and

creativity of each one of the District's team members and the historical investments made to strengthen the resiliency of the utility infrastructure owned by the District's customers. It is this pattern of thoughtful, comprehensive planning and prudent investment by the Budget Committee and the Board which will position the District in good stead for a future of continued reliable service delivery as desired and expected by District customers.

THE 2021-2022 BUDGET

The 2021-22 Budget reflects the current policy direction of the District's Board of Directors. That direction is clear in providing high-quality, reliable service at a reasonable cost to rate payers. The Budget reflects a stable level of service in the coming fiscal year without significant changes in operations. The District's capital plans and initiatives drive spending in each of the next few years (see the Capital Improvement Plan section of the Budget) as the District continues to address the needs of an aging collections and distribution infrastructure. Personnel services and materials and services costs are experiencing modest increases due to the impact of COVID-19 on the supply chain and cost-of-living adjustment (COLA) increases approved as part of the current collective bargaining agreement.

The Budget is a comprehensive document containing detailed revenues and expenditures for all funds operated by the District. The operating and capital budgets contained within this document have been prepared in accordance with Oregon Local Budget Law, per Oregon Revised Statutes (ORS) 294.305 to 294.565, the State Rules for (ORS) Chapter 264 Water Districts, (ORS) Chapter 450 Sanitary Districts, and (ORS) Chapter 198 Special Districts. The Budget represents a prudent and fiscally responsible financial plan for District operations and capital improvements during the next fiscal year and establishes a base for several years beyond.

SUMMARY OVERVIEW

This Budget has had extensive analysis and scrutiny and will continue to position the District as a solid, forward-thinking, fiscally responsible organization in service to District customers. The following summary highlights specific items contained in the 2021-2022 budget, and estimated effects on rates.

Financial Policies

The District's suite of financial policies approved by the Board have been applied to the 2021-22 budget. The District places emphasis on maintenance of appropriate fund balances and reserves in operating funds (Administrative Services, Drinking Water, Wastewater, and Watershed Protection Funds). Operating funds have budgeted contingencies for unexpected and unknown items, as well as transfers to cover debt service, and to capital funds for current and future construction, major maintenance, or replacement of infrastructure. While the District does not budget for full cost recovery related to depreciation of District assets, the Budget has provided for consideration of vehicles and equipment replacement in future years.

When considering the overall resources of the District, fund balances and reserves combine to provide one leg of a three-legged approach, with the other two legs being rates and financing. When managed together, they provide a stable strategy for operations and the acquisition and replacement of capital assets. The District is now actively working toward managing of fund balances and reserves to provide a smoothing of rate impacts for customers and a proactive, thoughtful approach to managing the District's systems.

Personnel Services Estimates

The District completed negotiations with the AFSCME bargaining unit representing the administrative and operations team members and a new three-year contract began July 1, 2020. The budget for the 2021-22 fiscal year does reflect the COLAs for both last year at 2.2% and 1.6% this year, which was not included in the prior year's costs.

The rates identified in this budget for the Public Employees Retirement System (PERS) are lower than anticipated. During the 2019-20 and 2020-21 fiscal years the District made a lump sum contribution of \$300,000 and \$552,000 respectively to "buy down" unfunded actuarial liability. The 2021-22 Budget includes an additional \$550,000 contribution to PERS for the same purpose. To date with these contributions the District has offset increases of PERS rates by a combination of two reductions, 0.72% and 1.29%, equally applied to Tier 1, Tier 2 and OPSRP rates. Continued contributions is a key strategy and is in the best financial interest of the District over the long run.

Consolidation of Buildings

The District's fiscal year 2021-22 budget defers consolidation of the District's facilities. If opportunities present which might be explored, discussion will be raised with the Facilities Sub-Committee and the Board of Directors.

Capital Planning

The fiscal year 2021-22 budget continues with a long-term capital plan for each of the water, wastewater, and watershed protection utilities. The Water System Master Plan was completed in the fall of 2020 and has provided for the anticipated level of capital necessary to meet that plan's requirements. The District began work on the Sanitary System Master Plan in the 2020-2021 fiscal year. That work will update capital plans in the wastewater collections system and plant and is anticipated to be completed by June 30, 2022. The fiscal year 2021-22 Budget includes funding for capital projects related to projects identified in the Water System Master Plan, the wastewater collections system and treatment plant, pending completion of master planning, and for watershed protection infrastructure. Details of these projects can be found in the Capital Improvement Plan section of this Budget.

Capital expenditures are made from the capital funds. Resources to the capital funds are in the form of transfers from the respective operating funds (i.e., Drinking Water Fund to Water Capital Fund). Transfers are in turn funded through rates. Looking forward in the

capital plans of the District, there may be opportunities to employ other financing strategies in the form of debt financing or partnerships with other governmental entities to accomplish specific capital projects.

Rate Impacts

Each of the items discussed above and typical inflationary increases result in proposed rate increases in all three utilities. The Management Team has been meeting over the last several weeks to submit to the Budget Committee a complete, fiscally prudent, and accurate Budget. As mentioned previously, this budget reflects priorities in accordance with the goals of the Board of Directors.

Stable, predictable rates are preferred by customers and promote the growth of the local economy. The fiscal year 2021-22 Budget incorporates anticipated rate increases in the three operating funds:

- Drinking Water with a 3.0% increase, an average of \$1.57 per two-month billing cycle;
- Wastewater with a 3.0% increase, an average of \$2.02 per two-month billing cycle;
 and
- Watershed Protection with a 2.5% increase, an average of \$0.48 per two-month billing cycle.

For illustration purposes, the District identifies an "average residential customer" as a single-family residence with a 5/8-inch meter and average water consumption for a two-month billing period of twelve (12) CCF. As a result of the proposed rates, the average estimated two-month bill for this average residential customer will increase a total of 3% or \$5.25 to \$182.53 from the current \$177.28.

BUDGET ASSUMPTIONS

The 2021-2022 adopted Budget incorporates the following assumptions:

Revenue Assumptions

- Increase in rates for Water, Wastewater and Watershed utilities.
- Maintained conservative base units for revenue forecasting.
- Non-payment of bills by customers at 2% (based on history).

Expenditure Assumptions

- 3% inflationary increase in materials and services.
- Medical and Dental estimates an increase in rates of 10.5%.
- PERS employer contribution rate for fiscal 2021-22 is lower than anticipated due to the continued contribution to PERS Side Accounts.
- Step increases for eligible employees.
- Prior year's 2.2% and current year's 1.4% cost of living (COLA) adjustment.
- Continued funding of customer assistance programs.

Overall Strategies for the 2021-2022 Budget and Beyond

- Continue to manage rates in the context of stable operations and planned infrastructure maintenance and replacement.
- Continue to maintain prudent fund balances and reserves.
- Complete master plan for wastewater utility.

CONCLUDING THOUGHTS

The District's financial status is strong and is projected to continue along this path as the District continues the focus on long-range planning and building a strong asset management program for all the infrastructure and equipment needed to deliver services. It is anticipated the Sanitary Sewer Master Plan will be completed by June 30, 2022.

The District's services are delivered 24 hours a day. The District strives to do this with an emphasis on cost-effective operations balancing both the near and far term maintenance, replacement, redundancy, and expansion needs of the utility infrastructure owned by all the District's customers.

ACKNOWLEDGEMENTS

This Budget was developed by the District's Management Team with assistance from District staff. The members of the Management Team come from various backgrounds and perspectives to represent the interests of the District. We want to acknowledge their hard-work, efforts, and engagement and extend the District's appreciation. We also want to thank the Board and the Budget Committee for their work in ensuring the District's Budget addresses what is needed for service delivery to customers now and into the future.

Like other local governments, the District will need to continue to be nimble, able to respond to changes resulting from the pandemic for our customers or changing requirements from State or Federal regulators. The District needs to be able to consistently deliver services - services that are key to our customers' health, every day without any interruption. Customers depend upon the District. We hereby respectfully submit the OLWSD District Proposed Budget for Fiscal Year 2021-2022.

Sarah Jo Chaplen General Manager

Such To A. Chapter

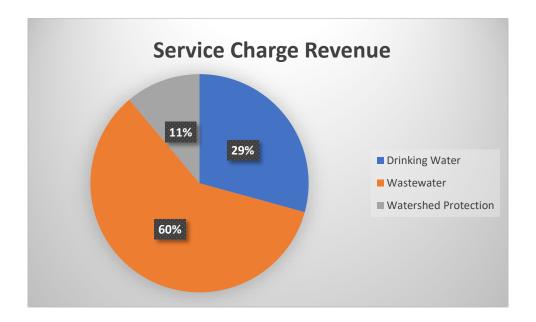

Gail Stevens
Finance Director and Budget Officer

SUMMARY BUDGET HIGHLIGHTS

The fiscal year 2021-22 budget for the District totals \$40.6 million (total resources and total uses) and can be summarized as follows: \$5.5 million for Administrative Services, \$5.5 million for Drinking Water, \$10.1 million for Wastewater, \$2.3 million for Watershed Protection, \$4.6 million for Debt Service, and \$12.6 million in capital.

Resources

Service charges revenue is the primary resource to each of the operating funds. Service charges combine with interest income, system development charges (SDC), other miscellaneous revenues, and beginning fund balance in each of the funds to comprise total resources. Revenue from service charges across the operating funds (Drinking Water Fund, Wastewater Reclamation Fund and Watershed Protection Fund) is illustrated in the chart below:

Resources within each fund support the operations and capital requirements associated with each utility's respective functions. Personnel services and materials and services are accounted for within each operating fund. Support services, debt requirements, and capital costs are budgeted and recorded in separate funds to which each operating fund makes transfers.

Fees are set in June each year with a July 1 effective date. Fees are set based on estimated requirements for each fund as a whole and in consideration of future operations and capital plans as projected.

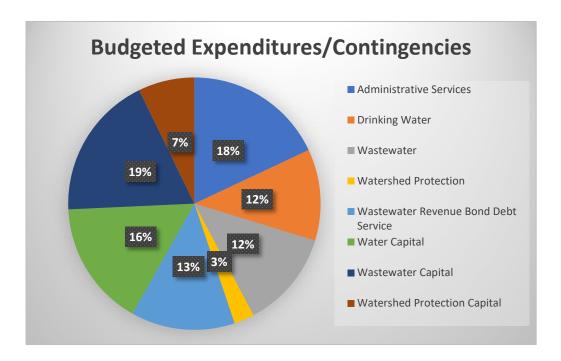

The fiscal year 2021-22 budget anticipates a nominal rate increase in the Drinking Water, Wastewater Reclamation Funds, and Watershed Protection of 3.0, 3.0 and 2.5%,

respectively. The resulting increase in the average, residential bimonthly bill is estimated at \$5.25, an increase of 3% in the overall bill when compared to fiscal year 2020-21.

Uses

Operating expenditures are budgeted by division within the Administrative Services Fund, and by category within each of the other funds. Personnel services and capital make up the majority of budgeted expenditures of the District for fiscal year 2021-22. Personnel services comprise 17.8% of the District's budgeted expenditures (excluding transfers) and capital spending makes up another 21.4%. The remaining budgeted requirements of the District include materials and services at 17.5%, debt service at 12.2%, special payments to PERS at 1.8%, and contingencies and reserves at 29.3%.

The chart below illustrates total expenditures (excluding transfers) by fund. Transfers among funds are excluded so as not to distort actual expenditures to parties outside of the District.

Personnel Services

The District budget includes 39 full-time regular (FTE) positions, this is an increase of 2 FTE over prior year. Benefit costs reflect increases in health insurance and quoted rates from providers. Employee insurance rates, which includes medical, dental, life, short-term disability, and long-term disability reflect a 10.5% increase.

PERS contributions are the other largest component of employee benefits. PERS rates on a biennial basis, and the scheduled rates for Fiscal Years 2021-22 and 2022-23 were set at 23.18% for Tier 1 and 2 members, and 19.21% for OPSRP members. The District

has contributed \$300,000 in fiscal year 2019-20 and \$552,000 in fiscal year 2020-21. These contributions have resulted in rates of 21.89% for Tier 1 and 2 members, and 17.92% for OPSRP members. Currently, 21% of District payroll is Tier 1 and 2, and 79% is OPSRP.

Materials and Services

This category represents operational expenditures for goods and services supporting the District. Legal, audit and accounting, and other contractual services are budgeted within this category, as are utilities, repairs and maintenance, and supplies. The increases budgeted for fiscal year 2021-22 result primarily from stepping up maintenance efforts related to the water and wastewater systems and anticipated inflationary increases in goods and services costs from vendors.

Capital Expenditures

A consistent and thoughtful approach to asset management, major maintenance, and replacement allows the District to proactively plan and project significant cost items, and plan resources to avoid volatile rate impacts to our customers. Maintenance of capital reserves is one component of the District's strategies for funding capital needs: the others being rates and debt financing. Separate capital funds are established to account for capital expenditures and ensure funding for future needs. Transfers from the operating fund provides resources to the capital funds and is complemented by interest earnings.

The fiscal year 2021-22 budget provides for capital spending in the Drinking Water Capital Fund of \$3.2 million, the Wastewater Reclamation Capital Fund of \$2.8 million, and the Watershed Protection Capital Fund of \$450 thousand. Each of the capital funds budgets for contingency to allow for flexibility in management of planned projects, funding for future year capital plans, and consideration for future replacement of equipment and vehicles.

Administrative Services Fund Fund 05

Purpose: The Administrative Services Fund centralizes the accounting and reporting for support services within the District – General Administration and Finance, Human Resources, Technical Services, and Vehicle Maintenance. Each of these support services are funded through transfers from the District's operating funds on a predetermined basis of allocation.

Goals: The goal of the Administrative Services Fund is to provide an efficient and fair means to capture and allocate support services costs

Full Time Employees (FTE): 16

Major Funding Source(s): Operating transfers from the Drinking Water, Wastewater Reclamation, and Watershed Protection Funds.

The following provides a brief description of support services accounted for in the Administrative Services Fund.

Administration & Finance - Division 01

The Administration & Finance Division accounts for activities related to the District's general administration, finance, and management. There are eight (8) full time employees within the Division comprised of the General Manager, Finance Director, Sr. Accounting Lead, Jr. Accounting Specialist, Accounting Technician, and three (3) Administrative Specialist II. The Senior Accounting Lead is a restructuring of a current position to a lead position with additional responsibilities. The Accounting Technician with a focus on accounts payable and one (1) Administrative Specialist II with a focus on finance collections are new positions.

Under the direct control of the District General Manager, this Division accounts for legal, audit, and other professional relationships and costs of the District. Office supplies and other central services costs related to administration of the District are budgeted in Division 01 as well – including janitorial, building maintenance, and utilities.

Under the direction of the Finance Director, activities and functions related to accounting, budgeting and financial reporting are accounted for in Division 01. Activities supporting the District's general ledger accounting, accounts payable and receivable, and utility billing and collections are all budgeted within the Administration & Finance Division.

Human Resources - Division 02

The Human Resources Division consists of two full-time employees, the Human Resources (HR) and Payroll Manager and the District Recorder. The HR and Payroll Manager is responsible for the oversight of personnel management, District payroll, risk management, OSHA requirements affecting all staff, recruitment and hiring, staff training, on-boarding, employment law and labor contract compliance as well as the District's insurance, including employee benefits, property, casualty, and worker's compensation.

The District Recorder is responsible for managing the District's records, public meetings, notices, packets, and minutes. The District Recorder is the District's Election Official, serves as an executive assistant to both the General Manager and the HR and Payroll Manager, and manages the Records Management Team. The District Recorder tracks pertinent District lists, including

contracts and vendors. In managing the District's records, the District Recorder ensures the District meets retention and destruction requirements for all records.

Board expenses are in the HR budget to coincide with the District Recorder's duties. The total of the District's property, casualty and cyber security insurance are budgeted in this Division to reflect the HR Manager's oversight of insurance and claims. Finally, all telephone and cell services are budgeted in Division 02 with oversight by the HR and Payroll Manager. Uniforms have been moved from individual funds to all reside in the HR budget for overall District oversight.

Technical Services – Division 03

Organizationally and for reporting purposes, the Technical Services Division is home to seven (7) full-time employees; the District Engineer, Water Services Engineer, Technical Services Coordinator, Development Review Specialist, Water Quality Specialist, Outreach and Communications Specialist, and Pollution Prevention Specialists. The Water Quality Specialist position is budgeted in the Watershed Protection Fund. Together, these positions provide direct support to the operating funds with respect to State issued permits, development review and permit issuance, project inspections, engineering, capital project management, information technology for the District, education, and outreach.

The District's information technology costs including hardware, software, and support services are budgeted within Division 03. Communications and outreach costs of the District are also budgeted within Technical Services.

Vehicle Maintenance - Division 04

The Vehicle Maintenance Division budgets and accounts for all maintenance and fuel costs related to the District's vehicles. The Division has no directly assigned FTE.

Drinking Water Fund Fund 10

Purpose: The purpose of the Drinking Water Fund is to manage and direct operations related to distribution of potable drinking water to the District's residents and customers.

The District maintains and operates a water transmission and distribution system to deliver water purchased directly from the North Clackamas County Water Commission (NCCWC). NCCWC takes water from the Clackamas River, treats it, and wholesales to customers including the District. The District is also part owner of the treatment plant operated by the NCCWC.

Goals: The following details the goals of the Drinking Water Fund:

- Efficiently meet the drinking water collection, transmission, and distribution needs of the community through uninterrupted service delivery.
- Provide fire protection.
- Protect community health.
- Provide safe drinking water to the community.

Full Time Employees (FTE): 7.80

Major Funding Source(s): Water service charges billed to District customers.

The Drinking Water Fund budgets and accounts for the cost of purchased water and all associated costs of delivering safe drinking water to District customers including system maintenance, and a share of the support costs attributable to the water operations via transfers to the Administrative Services Fund. The Drinking Water Fund also makes transfers to a capital fund for capital projects related to the distribution system.

The Utility Operations Director splits his time between water distribution and wastewater collections activities, and directly supervises a water field supervisor and six (6) water utility workers within the Drinking Water Fund. The Asset Resource Specialist is allocated at 0.3 FTE to the Drinking Water Fund.

^{***} Drinking water capital expenditures are budgeted in Fund 71 beginning with Fiscal Year 18-19.

Wastewater Reclamation Fund Fund 20

Purpose: The purpose of the Wastewater Reclamation Fund is to manage operating and capital requirements related to activities of the wastewater reclamation program.

Wastewater reclamation activities comprise managing a wastewater collection system totaling 100 miles in length, five strategically located wastewater pumping stations, and a facility that reclaims an average of 4 million gallons of wastewater per day. In a given fiscal year the District collects, treats, and reclaims more than 1.4 billion gallons of wastewater.

The District holds a National Pollutant Discharge Elimination System (NPDES) Permit issued by the State of Oregon Department of Environmental Quality (DEQ) that allows the District to be responsible for the management of the wastewater reclamation program in its service area. The NPDES Permit establishes mandatory water quality standards for the discharge of reclaimed water into the watershed. The main outfall point is located at the reclamation facility and discharge goes directly into the Willamette River.

Goals: The following details the goals of the Wastewater Reclamation Fund:

- Efficiently meet the wastewater collection, transmission, and reclamation needs of the community through uninterrupted service delivery.
- Provide environmental protection for the Willamette River.
- Protect community health.

Full Time Employees (FTE): 14.10; 8.30 FTE in Wastewater Treatment (Division 21) and 5.80 FTE in Wastewater Collections (Division 22)

Major Funding Source(s): Wastewater service charges billed to District customers.

The Wastewater Reclamation Fund is divided between two divisions: treatment and collections. The Treatment Division budgets and accounts for direct costs of treatment including electricity, chemicals, equipment, hauling and land application of biosolids, operation and maintenance, and other costs. The Collections Division is charged with maintenance of the system that brings wastewater to the plant. The Fund also pays a share of support services costs to the Administrative Services Fund via operating transfers based on an analysis of relative support received. The Fund also makes transfers to support capital projects and to cover debt service requirements related to the improvements and expansion at the treatment plant.

Staffing within the Wastewater Reclamation Fund is divided functionally between treatment and collection responsibilities. The Plant Superintendent directly oversees the treatment operations and directs the five (5) plant operators, two (2) mechanics, and the asset resource specialist position. The collections team is comprised of one-half of the Utility Operations Director position and four (4) collections utility workers. The Asset Resource Specialist is allocated at 0.3 FTE each to the Treatment and Collections Divisions, respectively.

Watershed Protection Fund Fund 30

Purpose: The purpose of the Watershed Protection Fund is to manage operating and capital requirements related to activities of the watershed protection program.

Watershed protection activities comprise managing a surface water management collection system totaling 84 miles in length. The District is a joint holder of a National Pollutant Discharge Elimination System (NPDES) Municipal Separate Storm Sewer System (MS4) Permit issued by the State of Oregon Department of Environmental Quality (DEQ) that allows the District to be jointly responsible for the management of watershed protection activities in its service area. The NPDES Permit establishes mandatory water quality standards for the discharge of un-reclaimed water into watersheds. Watersheds within the District service area include Boardman Creek and River Forest Creek; but discharge also occurs into Kellogg Creek and Rinearson Creek. All watersheds, or portions of watersheds, ultimately discharge to the Willamette River.

Goals: The following details the goals of the Wastewater Reclamation Fund:

- Educate residents, developers, contractors, businesses, industries, and youth about watershed protection.
- Protect local watersheds through planning, permits, and regulations.
- Minimize, or eliminate pollutants that may impair the proper functioning ecological condition of the area rivers, lakes, and streams.
- Operate, maintain, control, and regulate the negative impacts of surface water and storm water runoff to protect the community's health and safety.
- Where feasible, mitigate storm water impacts on public and private property during normal conditions.

Full Time Employees (FTE): 1.10

Major Funding Source(s): Watershed protection surcharges billed to District customers.

The primary costs budgeted and accounted for in the Watershed Protection Fund relate to system maintenance and communications and outreach related to surface water management and programs. Transfers are made to fund capital projects as well as to the Administrative Services Fund to cover support services provided.

There is one (1) full-time Water Quality Specialist position budgeted within the Watershed Protection Fund. Organizationally, this position reports to the District Engineer. The Asset Resource Specialist is allocated at 0.1 FTE to the Watershed Protection Fund.

Wastewater General Obligation Debt Service Fund Fund 40

Purpose: To account for principal and interest payments related to the District's debt associated with the wastewater treatment plant.

General Obligation Bonds

On May 13, 2010, the District issued \$24,000,000 in General Obligations (GO) Bonds. The bonds were on a twenty-year term to maturity with coupon rates ranging from 2% to 4%. On December 20, 2017 the District defeased \$14,310,000 of the callable portion which had a 4% coupon; and replaced them with a bank loan that has an interest rate of 2.5% to save approximately \$915K in total debt service through fiscal year 2030. The remaining portion of the original 4% bonds was retired in fiscal year 2019-20.

State of Oregon Infrastructure Finance Authority Loans

On August 31, 2010, the State of Oregon Infrastructure Finance Authority (IFA) loaned the District \$8,000,000 which originated from the State's issuance of Recovery Zone Economic Development Bonds. These are also known as United States Build America Bonds. The bonds will be repaid over a twenty-year term to maturity and the range of interest rates associated with the bond series is 2% to 2.84%. Of the amount borrowed 87% of the debt qualifies for a 45% interest subsidy from the United States Treasury. The net interest cost of the bond series to maturity is 2.71%.

On February 18, 2021, the State of Oregon Business Oregon refunded the bonds that funded the IFA loan. The District participated in the Bond Refunding, amending the loan agreement. Under the amended agreement, this debt is no longer secured by GO Bonds, now secured with a pledge of wastewater net revenue. All further debt service is transferred to Wastewater Revenue Bond Debt Service Fund.

The remaining fund balance at the end of fiscal year 2020-21 is transferred back to Wastewater Reclamation Fund, the original funding source.

Major Funding Source(s): Operating transfers from the Wastewater Reclamation Fund.

This fund budgets for scheduled principal and interest payments on the above-described debt.

Wastewater Revenue Bond Debt Service Fund Fund 50

Purpose: To account for principal and interest payments related to the District's non-property tax backed debt.

State of Oregon Department of Environmental Quality Clean Water State Revolving Fund Loan

In fiscal year 2011, the District received \$19,000,000 in loans from the State of Oregon Department of Environmental Quality Clean Water State Revolving Fund (SRF) Loan Program for Intended-Use Plans. Of the amount borrowed, \$12,573,566 or 66% of the funds comprised federal capitalization grant funds, whereas the remaining \$6,426,434 or 34% of the funds comprised state funds. The loans will be repaid over a twenty-year term to maturity and the range of interest rates associated with the loan series is 0% to 2.65% plus an annual administrative fee of 0.50% of the principal balance. The loans have a legal loan reserve requirement in which the District must place in reserve an amount equal to one-half the average annual debt service; as a result, the District has established a legal reserve amount of \$590,483. The program also has debt service coverage requirements in which the District must maintain wastewater rates in connection with the operation of the facility that are adequate to generate net operating revenues in each fiscal year sufficient to pay all revenue backed debt service requirements plus 5% of the loan's annual debt service expenditures.

JP Morgan Bank Loan

On December 20, 2017 the District borrowed \$15,173,000 from JP Morgan Bank in order to defease \$14,310,000 in General Obligation Bonds that were callable and had a 4% coupon rate. The loan will be repaid over a thirteen-year term to maturity and the interest rate is 2.50%. The advance refunding will save the District approximately \$915K in total debt service through fiscal year 2030. The loan has a debt service coverage requirement in which the District must charge rates and fees adequate to generate revenues that are at least equal to 20% of parity bond debt service and 100% of combined parity and subordinate obligation debt service.

State of Oregon Infrastructure Finance Authority Loans

On August 31, 2010, the State of Oregon Infrastructure Finance Authority (IFA) loaned the District \$8,000,000 which originated from the State's issuance of Recovery Zone Economic Development Bonds. These are also known as United States Build America Bonds. On February 18, 2021, the State of Oregon Business Oregon refunded the bonds that funded the IFA loan. The District participated in the Bond Refunding, amending the loan agreement for the balance of \$3,684,197.37 remaining. Under the amended agreement, this debt is no longer secured by General Obligation Bonds, now secured with a pledge of wastewater net revenue. Debt service will continue for the remaining ten-years of the original loan period, retaining the original maturity of December 1, 2030, with an all-in true interest cost of 1.323%. All further debt service will be out of this fund.

Major Funding Source(s): Operating transfers from the Wastewater Reclamation Fund.

Drinking Water Capital Fund Fund 71

Purpose: To account for debt proceeds, capital expenditures, contingencies and reserves associated with the District's capital improvement planning as relates to drinking water.

The District's water distribution system is primarily comprised of 6"and 8" cast and ductile iron pipe. The District has concentrated on eliminating sections of 2' pipe and looping dead-ends wherever practical.

The District has more than sufficient water storage to supply the system; water storage includes two 5 million-gallon reservoirs at the Valley View site and two 2.8 million-gallon reservoirs at the View Acres site. The Valley View Reservoirs are also used as the storage source to serve the Sunrise Water Authority.

During fiscal year 2020-21 the District adopted a Water System Master Plan which has been used to establish rates charged for water base and consumption charges and system development charges (SDC). The District now has an up-to-date hydraulic model to help staff identify and focus efforts within the capital improvement program (CIP).

Oak Lodge Water Services District owns the North Clackamas County Water Commission treatment plant in partnership with Sunrise Water Authority and the City of Gladstone which provides the daily water needs for the District.

Major Funding Source(s): Operating transfers from the Drinking Water Fund.

Refer to the Capital Improvement Plan for detailed information on planned capital projects.

Fund 71 - Drinking Water Capital Fund

Wastewater Reclamation Capital Fund Fund 72

Purpose: To account for debt proceeds, capital expenditures, contingencies and reserves associated with the District's capital improvement planning as relates to wastewater reclamation.

The District charges customers a monthly fee for sanitary sewer service that covers both base and consumption-related costs. Amounts are transferred to the Wastewater Capital Fund based on identified capital needs per the CIP and any current master planning.

This budget as proposed allows the District to wrap up treatment plant modifications to create redundancies and improve our solids process efficiency. A sanitary sewer master plan has also been proposed to help staff identify where to invest the next 30 years of capital expenses.

Major Funding Source(s): Operating transfers from the Wastewater Reclamation Fund. For more detailed information about each proposed project, please refer to the Capital Improvement Plan for detailed information on planned capital projects.

Watershed Protection Capital Fund Fund 73

Purpose: To account for debt proceeds, capital expenditures, contingencies and reserves associated with the District's capital improvement planning as relates to watershed protection.

The Oak Lodge Water Services District is responsible for water quality improvement projects within the communities of Oak Grove and Jennings Lodge. Although not formal cities, this portion of unincorporated Clackamas County is heavily urbanized with residential, commercial, and industrial development. Less than 5 years ago, an analysis of the District revealed that the total impervious area for the District is 80% -- that's about 2800 acres of surface that does not infiltrate water, all of which contributes to increased water velocity and scour in local streams, and the majority of which contributes pollutants into the surface water system, including streams and rivers.

Major Funding Source(s): Operating transfers from the Watershed Protection Fund. For more detailed information about each proposed project, please refer to the Capital Improvement Plan for detailed information on planned capital projects.
