

# THE BOARDMAN WETLAND PROJECT

## OVERVIEW

The Boardman Wetland Project is the result of partnerships among Oak Lodge Water Services District, Clackamas County, North Clackamas Parks and Recreation District, Metro, and other community interests. These groups are collaborating to implement improvements using respective partner missions, capital and expertise. Developed with community input, the Boardman Wetland Project will soon become a reality.

The project, which is part of the larger Boardman-Rinearson Watershed Complex, will deliver multiple benefits including ecosystem and stream health improvements. Other benefits include:

- Increase water storage and improve water quality
- Protect and improve wildlife habitat by adding a diverse assemblage of native vegetation
- Expand wetland public access for nature-based educational opportunities
- Provide recreational opportunities, including access to trails

# THE BOARDMAN WETLAND PROJECT

## SITE ENHANCEMENT

The Boardman Wetland Project features and site enhancements will include:

- Replace a sanitary sewer line under the wetland
- Build 841 feet of 8-foot-wide boardwalk and 562 feet of 4-foot boardwalk
- Construct outdoor learning classroom and hands-on education platform with pond access
- Plant 67 trees, 11035 shrubs, and 16,600 plants
- Install a parking lot for visitors
- Construct sidewalks on Addie Street
